PROFESSIONAL SUMMARY

Product Analyst with 2 years of experience analysing massive data, product performance, tracking feature usage, and building automated reporting systems. Proficient in SQL, Python, Power BI, and BigQuery to measure user behavior, product quality, and experimentation metrics.

EXPERIENCE

MRF Limited — Executive Technical (*Product Analyst*) | 2024 – Present

- **Product Specification & Variance Tracking:** Built an automated data pipeline using Python, dbt, BigQuery SQL, and Power BI Service to transform raw trial parameters and flag spec drift. Reduced daily verification time from 8 hours to 1 hour (87% time savings) and cut out-of-spec trial re-runs by 14%.
- **Product Defect & Root-Cause Engine:** Combined trial adjustment and defect data into a Power BI star-schema model. Applied DAX and Pareto analysis to identify top defect categories, cutting diagnostic review times by 35% and increasing trial pass rates by 11%.
- **Product Performance Telemetry:** Analyzed stress and wear-testing dataset logs using SQL to identify performance drop-offs, delivering weekly yield and quality reports to cross-functional R&D, QA, and Design leads.

SELECTED PORTFOLIO PROJECTS

Executive VoC Churn Intelligence Engine (Blinkit vs. Zepto) | *BigQuery SQL, Power BI, DAX, Python*

- Built a BigQuery and Power BI model analyzing 3,000 customer reviews, uncovering a 28.97% 1-star churn rate and showing SLA delays caused 10.47% of all complaints—with Zepto logging nearly double Blinkit's delivery issues (207 vs. 107).
- Designed DAX measures to track app stability across updates, catching buggy releases that dropped ratings by -0.33 stars (down to 2.88) and spotting a sharp 257-complaint spike in Blinkit's latest release.

Mobile Game Player Retention & A/B Testing Framework (Cookie Cats) | *Python (Pandas, Statsmodels), SQL (BigQuery), Power BI • Gemini API*

- Tested whether moving a game's progression gate hurt player retention, using SQL and a two-proportion z-test on 90K+ users; found a real 4.3% drop in Day-7 retention ($p=0.0016$) and recommended against the change.
- Wrote a script that pulls the stats straight into the Gemini API to draft the business memo, and built a Power BI dashboard to show the results clearly.

TECHNICAL SKILLS

Data & Analytics: SQL (CTEs, Window Functions), dbt (data build tool), Python (Pandas, SciPy, Statsmodels, Automation Scripting), Advanced Excel (Power Query, Pivot Tables, XLOOKUP), GCP (Cloud Functions, Cloud Scheduler), Git/GitHub, ETL/ELT Pipelines.

Visualisation: Power BI (DAX, Power Query), Data Modeling (Star Schema), Data Storytelling, Dashboard Development

Product & Business Analytics: KPI Definition & Tracking, Funnel Drop-off Analysis, Cohort Retention, A/B Testing, Product Benchmarking, User Behavior Analysis, SLA Tracking, Root cause Analysis

Product Skills: Requirements Gathering, Feature Prioritisation, Competitive Analysis, Process Optimisation

Soft Skills: Stakeholder Management, Cross-functional Collaboration, Business Communication

CERTIFICATIONS

Python for Data Science, AI & Development — IBM | *Issued: March 2026*

EDUCATION

Cochin University of Science and Technology (CUSAT) | *B.Tech — Mechanical Engineering* 2020 – 2024
