PROFESSIONAL SUMMARY

Product Analyst with nearly 2 years of experience at MRF Limited R&D — covering the full product analytics lifecycle: requirement gathering, KPI definition, dashboard delivery, A/B testing, and product launch readiness. Identified ₹118Cr in product revenue risk through data-driven anomaly detection and directly influenced a recall decision. Skilled in translating stakeholder needs into measurable metrics using SQL, Python, and Power BI. Seeking to bring product instinct and analytical rigour to a high-growth IT product company.

EXPERIENCE

MRF Limited (R&D) | Junior Executive Engineer (Product Analyst)

Aug 2024 – Present

- **Identified ₹118Cr product revenue risk** — built anomaly detection model flagging MRF-METEOR-8R at 2.8× defect baseline, directly informing a batch recall decision
- **Drove 75% faster product reporting** — Power BI dashboards replacing 3-day manual process — adopted across R&D and marketing stakeholder reviews
- **Automated Voice of Customer intelligence** — real-time system processing 1,200+ reviews, surfacing product defect priorities before warranty data arrives
- **Translated business requirements → product KPIs** — defined and tracked metrics across 8 SKUs over 18 months with Defect Rate, NPS, Return Rate, and Revenue at Risk
- **Reduced analysis turnaround by 20%** — re-engineered data collection and validation workflows, enabling faster product decisions
- **Built A/B testing frameworks** — designed experiment methodology to evaluate product changes and validate improvement hypotheses
- **Led cross-functional product alignment** — partnered with R&D, engineering, and marketing to align data insights with product strategy and launch readiness

PROJECTS

Predictive Quality Signal Tracker — Product Risk Intelligence System · Python · SQL · Power BI

- Defined product KPI framework with stakeholders; modelled 3,500+ records across 18 months of product performance data
- Anomaly detection triggered direct product decision (batch recall); Power BI dashboard became the standard product review tool

Voice of Customer — Automated Product Feedback Engine · Python · NLP · TextBlob · Pandas

- Mapped and automated manual complaint triage end-to-end; urgency model prioritised product response by risk severity
- Insights fed into R&D roadmap: Tread Wear (35% of complaints) and Sidewall Defects (urgency 9.4/10) flagged as top priorities

Customer Retention & Product Performance Analysis · SQL · Python · Power BI

- Identified product quality and delivery as primary churn drivers; findings proposed as input to product improvement strategy
- Stakeholder retention dashboard enabling ongoing product KPI monitoring across customer segments

User Funnel Analysis & Conversion Optimisation · SQL · Python · Power BI

- Product funnel with behavioral segmentation uncovering conversion drop-offs by device, traffic source, and user stage

TECHNICAL SKILLS

- **Data & Analytics:** SQL (MySQL), Python (Pandas, NumPy, NLP), Excel (Advanced)
- **Visualisation:** Power BI (DAX), Tableau, Data Storytelling, Dashboard Development
- **Product Analytics:** KPI Definition & Tracking, Funnel Analysis, A/B Testing, Product Benchmarking, User Behavior Analysis, NPS
- **Product Skills:** Requirements Gathering, Feature Prioritisation, Launch Readiness, Competitive Analysis, Process Optimisation
- **Soft Skills:** Stakeholder Management, Cross-functional Collaboration, Business Communication

CERTIFICATIONS

- Python for Data Science, AI & Development — IBM | Issued: March 2026

EDUCATION

Cochin University of Science and Technology (CUSAT) | B.Tech — Mechanical Engineering

2020 – 2024
